Abstract

Library holds a distinct part in history as the carrier of knowledge and information through time. If the entire library is to advance smoothly towards its own goals of releasing its resources for efficient delivery of services to library customers, it is critical that the many departments and functions of the library be harmonized. Coordination, an advantage of this approach that is directly tied to the managerial variable of organization, is used to carry out this vital job. There are various factors which acts as a break to the proper management of the libraries. With the help of this paper factors have been identified for the management of libraries. Sample of 193 people from library department of different institutions were surveyed to know the factors that affect the effective management of libraries. It is found that there are different factors like Resource construction, Production of a specific catalogue, Faultless system mechanism, and operative employment instrument, Radiocommunication coverage area, and network security etc that affects the effective management of libraries.

Keywords: Library, Information, Management, Organization.

1. Introduction

The science of library management has always been undervalued in the society. Library has been a long and integral part of human society and was also a key factor in the progress and development of humans we know so far. Libraries are considered as the center of knowledge or knowledge hub. Libraries in the modern world has to be developed and modernize for ease of use and also to minimize time for finding books. Libraries are filled with thousand and thousands of books and thus to manage through it for better reading experiences becomes crucial in nature. Libraries around the world carry the evidence of progress of human civilization. The art of library science has been developed and standardize in order to attain maximize its utility and thus reducing time taken to do it. If the entire library is to advance smoothly toward its goals of unleashing its resources for efficient provision of services to library customers,
